

PL-HM-600

Overview

The PL-HM-600 is a professional 600W haze machine designed for stage, event, and architectural lighting applications. Engineered to deliver a consistent and fine haze output, it enhances light beams and atmospheric effects without producing dense fog.

With instant operation (no heat-up time), flexible control options including DMX, remote, and manual modes, and an adjustable fan system, the PL-HM-600 ensures precise haze distribution across various environments. Its robust construction and stable performance make it an ideal choice for theaters, concerts, studios, and indoor venues.

Product Specification

Items	Details
Product Type	Haze Machine
Wattage	600W
Heater	600W
Output	6000 cu.ft/min
Heat-Up Time	No preheating required
Tank Capacity	1.7 L
Control Modes	DMX512 / Remote Controller / Manual
Fan Angle	Adjustable
IP Rating	IP20
Power Supply	AC 110-220V
Power Consumption	600W
Dimensions (L × W × H)	52 × 40 × 45 cm
Weight	21 kg

Feature

- 600W professional haze output with fine and uniform dispersion
- Instant operation with no heat-up time required
- Multiple control modes: DMX512, remote controller, and manual control
- Adjustable fan angle for flexible haze coverage
- High output performance up to 6000 cu.ft/min
- Large 1.7L tank capacity for extended operation
- Compact and durable design for professional applications
- Suitable for stage, theater, studio, and event environments
